

# FunaGig Test Accounts

This document contains all test accounts created for the FunaGig platform in production.

## Production URL

Frontend: <https://vercel-frontend-url> (to be updated)

Backend API: <https://plankton-app-3beec.ondigitalocean.app/>

## Test Account Credentials

### Student Accounts

#### 1. Alice Johnson (Primary Student)

- **Email:** [alice@demo.com](mailto:alice@demo.com)
- **Password:** demo123
- **University:** MIT
- **Major:** Computer Science
- **Graduation Year:** 2025
- **Profile:** Tech-focused student, ideal for technical gig testing

#### 2. Bob Smith (Secondary Student)

- **Email:** [bob@demo.com](mailto:bob@demo.com)
- **Password:** demo123
- **University:** Stanford University
- **Major:** Data Science
- **Graduation Year:** 2024
- **Profile:** Data science student, good for analytics and research gigs

#### 3. Carol Davis (Third Student)

- **Email:** [carol@demo.com](mailto:carol@demo.com)
- **Password:** demo123
- **University:** UC Berkeley
- **Major:** Business Administration

- **Graduation Year:** 2026
- **Profile:** Business-oriented student, perfect for marketing and business gigs

## 4. Previously Created Student

- **Email:** [test@funagig.com](mailto:test@funagig.com)
- **Password:** password123
- **Profile:** Basic test account for general testing

# Business Accounts

## 1. Tech Solutions Inc (Primary Business)

- **Email:** [techsolutions@demo.com](mailto:techsolutions@demo.com)
- **Password:** demo123
- **Industry:** Technology
- **Company Size:** 50-100 employees
- **Profile:** Mid-size tech company, posts development and IT gigs

## 2. Creative Media Corp (Secondary Business)

- **Email:** [creativemedia@demo.com](mailto:creativemedia@demo.com)
- **Password:** demo123
- **Industry:** Marketing
- **Company Size:** 10-50 employees
- **Profile:** Marketing agency, posts creative and digital marketing gigs

## 3. Healthcare Innovations Ltd (Third Business)

- **Email:** [healthcare@demo.com](mailto:healthcare@demo.com)
- **Password:** demo123
- **Industry:** Healthcare
- **Company Size:** 100+ employees
- **Profile:** Large healthcare company, posts research and healthcare gigs

## 4. StartupHub Ventures (Startup Business)

- **Email:** [startup@demo.com](mailto:startup@demo.com)
- **Password:** demo123
- **Industry:** Consulting
- **Company Size:** 1-10 employees

- **Profile:** Small startup, posts diverse small-scale gigs

## 5. Previously Created Business

- **Email:** [business@funagig.com](mailto:business@funagig.com)
- **Password:** password123
- **Profile:** Basic test business account for general testing

# Testing Scenarios

## Authentication Testing

- Use any account to test login/logout functionality
- Test session management and security

## Gig Management Testing

- **Business accounts** can create, edit, and manage gigs
- **Student accounts** can browse, apply to, and manage applications

## Messaging Testing

- Create conversations between business and student accounts
- Test real-time messaging features

## Profile Management

- Test profile updates for both account types
- Verify data persistence and validation

## Cross-Account Testing

- Business posts gig → Student applies → Communication flow
- Multiple students applying to same gig
- Business managing multiple active gigs

# API Endpoints to Test

## Authentication

- POST /login - Test with any account above
- POST /logout - Test session termination
- GET /profile - Test authenticated user data

## Dashboard

- GET /dashboard - Different views for student vs business

## Gigs

- GET /gigs - Public gig listings
- POST /gigs - Business account creating gigs
- POST /applications - Student account applying to gigs

## Messaging

- GET /conversations - User's message threads
- POST /messages - Sending messages
- GET /messages/{conversation\_id} - Message history

## Notes

- All accounts use the password pattern: demo123 or password123
- Accounts are created in production database
- Use these accounts for comprehensive testing of all platform features
- Remember to test cross-user interactions (business-student workflows)

## Security Note

These are test accounts for development and demonstration purposes only. Do not use these credentials in any production scenario outside of testing.
